

# SFG Brewery Order Service Docs

Damian Garcia :doctype: book :icons: font :source-highlighter: highlightjs

Sample application demonstrating how to use Spring REST Docs with JUnit 5

BeerOrderServiceControllertest makes a call to a very simple service and produces three documentation snippets.

One showing how to make a request using cURL:

Unresolved directive in index.adoc - include::{snippets}/orders/curl-request.adoc[]

One showing the HTTP Request:

Unresolved directive in index.adoc - include::{snippets}/orders/http-request.adoc[]

One showing the HTTP Response:

Unresolved directive in index.adoc - include::{snippets}/orders/http-response.adoc[]

Response Body:

Unresolved directive in index.adoc - include::{snippets}/orders/response-body.adoc[]

Response Fields:

Unresolved directive in index.adoc - include::{snippets}/orders/response-fields.adoc[]
